Aim

At Cawood CE VA Primary School we aim to meet the needs of all our children and promote their welfare. We recognise and assist children with intimate care where needed, and ensure that the children are treated with courtesy, dignity, and respect at all times.

Intimate care is defined as care involving washing, touching or carrying out a procedure to intimate personal areas which some children may need support in doing because of their young age, physical difficulties or other special needs.

Where a child has intimate care needs, a member of staff will take responsibility to provide their care. We address issues on an individual basis.

Due to the developmental stages of the children that we work with, we support them with their personal care: reminding the children to go to the toilet, hygiene etc to develop their independence. As outlined in the foundation stage curriculum, we are responsible for children's personal care skills, as an essential part of Personal Development, in order to be able to access the rest of the curriculum.

If children come to the nursery in nappies we support children sensitively and with dignity in this matter. Also, from time to time some children will have accidents and need to be attended to. Parents are asked to supply a bag of clean clothes for their child in a drawstring bag to be hung on their child's peg. These are taken into the toilet facilities prior to changing.

If a child has needed help with meeting intimate care needs (had an accident), this is treated as confidential and shared with the parents in person at the end of the day.

Implementation

Staff training

All staff are knowledgeable about intimate care/personal care. They are aware of their responsibilities, relevant policies and procedures in place (including adhering to Child Protection, Health and Safety, Confidentiality). They follow the child's care plan and they undertake their duties in a professional manner at all times. They are fully aware of best practice including hygiene.

Intimate care / personal care plan

If a child requires regular assistance with intimate care staff meet with the parents, to discuss the child's needs and devise an agreed intimate / personal care plan. Relevant health personnel are involved if needed. We monitor and review the plan on a regular basis.

Practice

The designated practitioners who provide the care form a strong, trusting relationship with the child. They ensure that it is a positive experience that is safe and comfortable for all. Whilst the child is having their needs met, it is treated as a time to converse and promote their personal development.

The child is encouraged to undertake as much of the procedure for themselves as possible, including washing intimate areas, dressing/undressing and hygiene.

The toilet areas in the nursery and reception classrooms are used to attend to a child's needs and every effort is made to ensure privacy and modesty. A shower is available in nursery.

Most procedures are carried out by one person. However, careful consideration is given to the child's individual circumstances to determine how many practitioners might need to be present when a child needs help with intimate care.

If a child is unhappy or anxious about the care being provided, the issue will be addressed to ensure that we continually meet a child's needs.

Working with parents

We work closely with parents to identify and ensure we meet the child's needs. Cultural and religious values are respected when planning for their care. We seek to engage in regular communication with parents, and monitor and review the plan together.

Working with outside agencies

We work closely with outside agencies and utilize their knowledge and expertise where necessary. The SENCO, coordinates this approach.

Disposal of nappies, aprons and gloves safely

We have in place good hygiene practices when disposing waste to stop infection.

We follow stringent nappy changing procedures to ensure the safe disposal of waste, see below.

Changing a nappy

- Gloves are worn every time a child is changed, after having washed their hands thoroughly.
- Whilst changing, children's skin is cleaned with a disposable wipe/creams if needed.
- Nappies and 'pull ups', gloves and wipes are disposed of hygienically and safely by double bagging and placing in the medical waste only bin.
